PROFESSIONAL SUMMARY

Senior product designer leading complex banking, enterprise, and AI-powered products from strategy and discovery through to polished, shippable experiences across responsive web and mobile. Strong in systems thinking, interaction design, information architecture, prototyping, user research, usability testing, design systems, reusable patterns, and AI-enabled workflows. Brings clear design rationale, stakeholder influence, and close collaboration with product and engineering teams to turn ambiguous business and technical requirements into scalable, user-centred product experiences.

WORK EXPERIENCE

Constantinople | Senior Product Designer **Jul 2026 - Present**

- Lead end-to-end product design for Term Deposits and Transactions, translating complex banking requirements into clear customer journeys, responsive web and mobile interfaces, and reusable patterns for client banks.
- Lead as the sole designer for an internal product capability replacing Amazon Pinpoint, shaping product direction and defining the capabilities required to close migration gaps.
- Strengthened the design system by connecting Figma components to production code through Code Connect, improving component discoverability and design-to-development alignment.
- Enabled more accessible customer-facing experiences by adding descriptive alt text and semantic role labels across product interfaces.
- Created conversational Claude agents in Slack to reduce repetitive coordination and improve team workflow efficiency.
- Built reusable AI design skills for Claude and Cursor, turning design methods into repeatable workflows for exploration, synthesis, and delivery.

Readytech | Product designer (Contract) **Nov 2025 - May 2026**

- Owned mission-critical JR Ready enrolment planning from ambiguous client requirements to clear flows, shippable scope, and milestone 1 for **3K active TAFE students**, using front-end code to accelerate detailed Figma specifications, component creation, and design-system contribution.

Synergy Protection Agency (Freelance) | Product Designer **Sep 2023 - Present**

- Led discovery and end-to-end design for a web and mobile dashboard, translating stakeholder and user interviews into practical product direction, flows, prototypes, and high-fidelity experiences that improved navigation and task clarity.

Atlassian | Designer **2022-2025**

Enterprise Ready Login Customisation

- Shaped the new login customisation feature settings which strengthens user security, reaching **4.5 million monthly users** and directly addressing **600 support requests**, saving the company **$57,000 annually in support costs.**
- Developed high-quality Figma experiences, focusing on clear content, interaction states, visual polish, scalable workflow decisions, and engineering constraints.

AI Admin Hub audit log onboarding

- Strengthened the manual and error-prone onboarding process with over **40+ new logs onboarded every month** by designing a new automated flow, improving the user experience for **all 4.5 million monthly users** using the audit-log platform in Admin Hub.
- Led engineers and designers across different timezones to leverage NLP and input validation, improving audit-log structure, visibility, validation, and usability.

Multi-Org Domain claim

- Used Figma to shape user workflows that championed user-centred design, unblocking large enterprise customers and increasing Admin Hub revenue by an estimated **$100k per month.**
- The feature is now used by **325 organisations**, which include **42,000+ Atlassian accounts** that are now managed from these shared domains.

Atlassian's first AI powered performance review tool

- Decreased bi-annual performance review estimates by 10 hours per employee each cycle by leading engineers, designers, and a program manager to design Atlassian's first AI-powered performance tool.
- Streamlined the performance process by **driving over 30% company adoption in the first performance cycle, saving 10,000 hours in the last half of the financial year.**

Atlassian Design Operations

- Reshaped how designers work by creating a standardised **Jira playbook adopted by 50+ designers.**
- Built on Atlassian's AI capability and created a **full-day AI design workshop for 105 attendees**; facilitated monthly Content Design community talks with **30+ participants.**

ACADEMIC HISTORY

Auckland University of Technology | 2023
Bachelor of Communication Design

Yoobee Colleges of Creative Innovation | 2022
UX Design Micro Credential Course

CERTIFICATIONS

Certification of Interface Design | 2025
Shift Nudge

Ultimate Figma Masterclass 2.0 | 2025
Designership

SKILLS

Product	Senior product design, banking products, UX/UI strategy, complex digital products, self-serve experiences.
UX craft	Information architecture, interaction design, user flows, prototyping, responsive web.
Research	User research, usability testing, insight synthesis, UX metrics.
Systems	Design systems, reusable patterns, Figma components, AI design skills, documentation, design QA.
Tools	Figma, Miro, Dovetail, Adobe Creative Suite, Jira, Confluence, Claude, Cursor, Codex, Copilot.
Languages	Fluent in Mandarin and English.
